NOTIFYMe DEMIWARE InspecTeam qsi quality services italy HORIZON INVESTIMENTI

On the path to the Smart Factory.

Identify where your business currently is **in its digital transformation journey** and start planning your smart manufacturing strategy.

Level 1 — The Unconnected Factory

A factory operating **without a central database** holds data generated via various systems in different locations.

Level 2 — The Connected Factory

Systems provide data to a central source of truth, enabling managers and decision makers to innovate in multiple areas of the manufacturing process, including quality, logistics, planning and sales.

Level 3 — The Automated Factory

At the very top level of **Industry 4.0**, manufacturers use **data-led insights** and **automation** to identify where efficiencies can be made.

Technologies for a more efficient Supply Chain.

Our experts help you digitilize and **automate your existing supply chain processes** for greater efficiency.

- **Improve communication** and **collaboration** with your suppliers,
- **Streamilne** sales order and quality management, and **automate processes** across the order-to-cash cycle.

Why choose Horizon Group as a partner?

Transform and streamline **internal and external business processes**.

Save time and **reduce mistakes** through standardization and process automation.

Collect information from sensors, systems and staff to enable data-driven decisions.

NOTIFYMe

Collaborative Workflows for business process digitalization.

notifyme.tech

Orchestrate your business processes with NotifyMe.

Pre-installed workflows **automate repetitive tasks** like approval of project documentation, Notification of Inspection management, follow-up on Non Conformities, and more.

Streamline your internal and external business processes to accelerate day-to-day activities, save working hours, and focus on the productivity and growth of your organization.
